

Installation of the Cabri 3D plug-in

To install the Cabri 3D plug-in (Cabri 3D document viewer for the Internet), open the [Cabri 3D Plug-in](#) folder and double click on the [Install Cabri 3D Plug-In](#) package file. Follow the instructions...

To check the installation success of the plug-in, open the [Cabri 3D on the web.html](#) document in your web browser. You can find the file in the [en](#) folder from the [Examples](#) folder. You will see a geometric construction. Move the camera using right-click (or ctrl-click) and drag...

Important note:

The plug-in is compatible with Safari, as well as with Netscape-based browsers (Mozilla, Firefox, etc.). It does not work with Internet Explorer.

The whole CABRILOG team wishes you many exciting hours of exploration and discovery.
